### HEAT SEAL INSTRUCTIONS

#### Application Conditions

Temperature: 280-320°F (138°C to 160°C)

Time: 10-20 seconds

Pressure: 4-6 bar (medium to heavy pressure)

#### Instructions and Additional Information:

Apply proper heat and pressure for the recommended dwell time. The carrier film can then be removed hot. Allow to cool before stretching.

Notes: Do not wash for 24 hours after application and ensure press is at correct temperature. Pre-Production testing is advised and is available upon request.

### ARTWORK & TURNAROUND

Vector files required
