CUSTOM EMBROIDERED

Custom Embroidered Emblems are perfectly crafted by machine embroidery with 100% polyester threads and 100% polyester twill fabric to achieve a lustrous sheen and brilliant color.

PENNBROIDERY® APPLIQUE

PennBroidery® Appliqué Emblems also known as Hand Cut Emblems or Laser Cut Appliques, simulate the look of direct embroidery, with the ability to have cut-outs inside the emblem itself.

PENNFLOCK™

PennFlock™ is an innovative emblem that utilizes polyester flock fibers that bond to ink for a permanent image. Graphics are fused to the emblem so they will not wash or fade out over time. PennFlock™ is also available in a 3D version.

PENNFLEX™

PennFlex™ Emblems provide an enhanced alternative to direct embroidery. These emblems are lightweight and flexible with a metallic finish option.

PENNEDGE®

PennEdge® Embroidered Emblems perfectly blend with a garment's fabric for a polished, professional image. The patented PennEdge® process uses a unique, color-matched mini border to meld the emblem's low-profile edge into the base.

PENNWEAVE® WOVEN

PennWeave® Woven Emblems offer an intricate logo in a more flexible patch. The process of weaving threads produces exceptionally fine details and tiny lettering not achievable in embroidery.

HIGH VISIBILITY EMBLEMS

High Visibility Emblems are made with fluorescent materials and threads that reflect more light than they absorb and are therefore more visible in daytime and low light conditions.

REFLECTIVE

Featuring a merrow or screen printed border, these durable reflective emblems are made of Scotchlite™ by 3M™, providing enhanced visibility to keep workers safe.

FLAME RESISTANT EMBLEMS

Flame Resistant Emblems are manufactured using the same techniques as custom embroidered emblems but with the added protection of 100% Dupont Nomex® flame resistant fibers and a fire resistant backing.
